

HELLENIC REPUBLIC
CAPITAL MARKET COMMISSION

Athens, 29 December 2025

PRESS RELEASE

Vassiliki Lazarakou, President of the Hellenic Capital Market Commission, re-elected as Bureau member of the OECD Corporate Governance Committee for 2026

The President of the Hellenic Capital Market Commission, Ms Vassiliki Lazarakou, has been re-elected as a Bureau member of the Corporate Governance Committee of the Organisation for Economic Co-operation and Development (OECD) for 2026.

The OECD is an international organisation comprising developed countries committed to the principles of representative democracy and a free-market economy. Its mission spans a broad range of issues, focusing on improving economic performance, creating jobs, enhancing education at all levels, and combating international tax evasion. As a global knowledge hub, the OECD generates data and analysis, facilitates the exchange of experiences and best practices, and provides strategic advice on public policy while setting international standards.

The OECD Corporate Governance Committee plays a pivotal role in guiding the Organisation's work on corporate governance, corporate finance, and state-owned enterprises. It oversees the implementation of the OECD/G20 Principles of Corporate Governance and the Organisation's guidelines for the governance of state-owned enterprises. Additionally, it supports dialogue with non-member economies on these critical issues.

Commenting on her re-election, Ms. Lazarakou stated: "It is a great honour for the Hellenic Capital Market Commission to continue serving on the Bureau of the OECD Corporate Governance

Committee. Over the past year, the Committee has focused on promoting and implementing the Organisation's Revised Principles of Corporate Governance, adopted by the G20 in 2023. In Greece, the Hellenic Capital Market Commission presented the recent changes to these Principles and explored how they can be integrated into the legislative framework. The revised Principles provide updated guidance on key corporate governance topics, including transparency, management responsibilities, and governance adjustments driven by technological developments in capital markets. For the first time, they also include extensive references to sustainability, helping businesses address climate-related risks and challenges.”
