HELLENIC REPUBLIC
CAPITAL MARKET COMMISSION

Athens, 10 November 2026

PRESS RELEASE

Vassiliki Lazarakou, Chair of the Hellenic Capital Market Commission, re-elected as Bureau member of the OECD Corporate Governance Committee for 2027

The Chair of the Hellenic Capital Market Commission, Ms Vassiliki Lazarakou, has been re-elected as Bureau member of the Corporate Governance Committee of the Organisation for Economic Co-operation and Development (OECD) for 2027. Ms Lazarakou has served as a member of the Committee's Bureau since 2023.

The **Organisation for Economic Co-operation and Development (OECD)** is an international organisation that promotes cooperation among countries and the exchange of experience and best practices for the development of public policy. The OECD produces data and analyses and provides strategic policy advice across a wide range of areas, from improving economic performance and fostering job creation to advancing education and combating international tax evasion. It also contributes to the development of international standards.

The **OECD Corporate Governance Committee** coordinates the Organisation's work on corporate governance, corporate finance, and state-owned enterprises. In this context, it oversees the implementation of the G20/OECD Principles of Corporate Governance and the Organisation's guidelines for the governance of state-owned enterprises. In addition, it leads and supports dialogue with non-member economies on these issues.

Commenting on her re-election, Ms. Lazarakou stated: "My re-election to the Bureau of the OECD Corporate Governance Committee for 2027 is both a great honour and a significant responsibility. It also constitutes recognition of the active contribution of the Hellenic Capital Market Commission to the international policy dialogue and to the promotion of high standards of corporate governance. The implementation of the G20/OECD Principles of Corporate Governance is an important tool for enhancing transparency, strengthening board accountability, and protecting investors. Adapting to technological developments and integrating sustainability considerations into corporate governance frameworks remain critical challenges for companies and capital markets alike. With consistency, a spirit of cooperation, and a shared commitment to our common objectives, we will continue to

contribute to the exchange of expertise and the promotion of best practices, supporting the orderly functioning of markets and the protection of investors."
